FOR IMMEDIATE RELEASE

TOMAHAWK TECHNOLOGIES DEMONSTRATES PARKADMIN AT CPA CONFERENCE & TRADE SHOW 2003

CARLETON PLACE, CANADA– Tomahawk Technologies, a leading provider of intuitive web based parking and office management solutions announced today that they will be attending the CPA Conference & Trade Show 2003 October 5th - 8th, 2003 in Gatineau, Quebec.

ParkAdmin is the world's first web based permit management solution designed from the bottom up. A few of the features that make ParkAdmin the parking solution of choice include:

- Management of parking permits as well as lockers
- Tracking and management of violations
- Real time reporting
- Intuitive, easy to use backend management functionality

“The ParkAdmin solution has been developed taking into consideration the business needs and the parking process requirements,” said Robin Mulloy, President of Tomahawk Technologies. “We are very excited about showcasing the ParkAdmin solution to the CPA delegates.”

About Tomahawk Technologies

Tomahawk Technologies Inc. is a leading provider of intuitive web based parking and office management solutions. For more information visit www.parkadmin.ca or call 1-888-606-5739.

About the Canadian Parking Association:

The Canadian Parking Association was founded in 1983 with the primary goal to become the voice for the parking industry in Canada. The first annual conference and trade show was held in 1984. The Association provides valuable benefits such as: professional development, networking opportunities and resource materials for your business. Annual conferences and trade shows have taken place across the country from Halifax to Vancouver. In addition, several district chapters have been formed, where topical issues affecting your area can be examined at the local level. The Association is carefully structured to include private and public sectors with members from public parking companies, municipalities, hospitals, universities, airports, suppliers and consultants. The Canadian Parking Association is the only one of its kind representing the public parking industry throughout the country. The need for public parking continues to grow yearly and with this growth comes new challenges and issues facing the parking industry as a whole.
